

Why does Iran have a shortage of electricity & gas?

Chronic under-investment in infrastructure exacerbated by US sanctions as well as mismanagement and huge state subsidies -- which encourage high fuel consumption and overburden the cash-strapped state -- have left Iran with worsening shortages of electricity, gas and petrol.

How much energy did Iran spend in 2022?

According to the IMF, Iran spent \$163bn in explicit and implicit energy subsidies in 2022, which amounted to more than 27 per cent of GDP -- the highest share of the economy of any country in the listing.

Do Iranians have a right to cheap energy?

Subsidies are so large and have been in place for so long that many Iranians -- suffering from high inflation, falling living standards and a sliding national currency -- have come to feel they have a right to cheap energy.

How much does a litre of petrol cost in Iran?

Iranians are charged less than three US cents for a litre of petrol at the pump -- vying with Libya and Venezuela to be ranked as the cheapest rates in the world.

In Iran, about 83.6% of the wastes generated ends up in landfill, 10.5% goes to the composting process, and only approximately 5.9% is recycled (P. Rupani et al., 2019). Therefore, paying attention to MSW management in this ...

5 ???· As the world waits to see whether or not Israel and Hezbollah will adhere to the recently agreed upon (and already violated) cease-fire, it is important to analyze what threats remain and how further escalation could impact the regional war and global energy markets.
