

# Is home solar power economical

Are solar panels worth it?

The investment in solar panels is worth it for the average UK home. For example, the typical 3-bedroom house in the UK is equipped with a 4kW solar panel system, enabling homeowners to potentially save around £163,600 annually on electricity expenses.

Are solar panels a good investment?

Buying solar panels is a long-term investment that should help cut your electricity bills and carbon footprint. But will they pay for themselves and earn you money? Solar panels are often marketed as a way to save money on electricity - and sometimes as a way to make money too.

Do solar panels increase a home's value?

Solar panels will raise your home's value by 3% on average, adding thousands of pounds to its price tag. A solar panel system typically boosts a home's Energy Performance Certificate (EPC) rating by 18 points - a whole grade - according to our calculations, which are based on the government's Standard Assessment Procedure (SAP) guidance.

Do solar panels save energy in the UK?

Depending on where you live in the UK, the solar panel system could save an average of around one tonne of carbon per year, according to Energy Savings Trust. Year-round efficiency: Solar panels can be efficient year-round in the UK, despite the country's reputation for cloudy weather.

Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.

Can you save money on solar panels?

Another option for solar panel funding is the new VAT reduction on energy-saving products, such as PV panels. This means that, until March 2027, you'll pay 0% on VAT to help homeowners transition to renewable energy. The average household could potentially see up to tax savings worth £2,850.
