

Is it cost-effective to install photovoltaic panels for home use

How much does a solar panel installation cost?

Generally, two installers will work together to install your solar panel system, and depending on its complexity, they can take up to 3 days to complete the installation. This means that you can expect to spend anywhere between £600 and £3,000 on labour costs alone.

Should you consider solar panels as a home improvement?

It's also worth considering solar panels' value as a home improvement. Solar panels are attractive to potential new homeowners when you next sell your home, which can increase your property value as a result.

How much does a solar panel cost per kilowatt?

Exactly how much a solar panel costs per kilowatt depends on the type of solar panel you're talking about. Monocrystalline solar panels are the most expensive, and their cost per kW is somewhere around £1,000 - £1,500, whereas polycrystalline solar panels cost about £900 per kW.

Do you own solar panels?

You **OWN** the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.

How much does a solar panel cost in the UK?

The average cost of a solar panel system for a typical three-bedroom house in the UK is £9,600, including a battery. Solar panels can save you up to £1,014 annually, totalling nearly £30,000 of savings over their lifespan. Adding a solar battery can boost your energy savings by up to 90 per cent.

Why should you install solar panels?

Installing solar panels lets you use free, renewable, low carbon electricity. You can sell surplus electricity to the grid or store it for later use. According to low-carbon certification organisation MCS, there were more than 183,000 solar panel installations across the UK in 2023.
