

# Is it good to install photovoltaic panels on residential roofs

Is my roof suitable for solar panels?

If the sun sets in front of you, it's west-facing; if it sets to the left, it's north-facing; and if it sets on the opposite side of the property, it's east-facing. Here's how an installer will decide if your roof is suitable for solar panels, including assessing its direction, usable space, and loft.

Can you install solar panels on a flat roof?

The DNO is the company responsible for bringing electricity to your home. Usually, your installer will register the device for you. Yes, it's okay to install panels on flat roofs. Solar panels work best when angled towards the sun, so panels on flat roofs are normally tilted up to help maximise energy production.

Can a UK roof support solar panels?

As long as your roof is pitched, has enough unshaded space, and doesn't contain spray foam insulation underneath, it should be suitable for solar panels. The large majority of UK roofs are more than capable of supporting solar panels for as long as you need them to.

How many solar panels can be installed on a roof?

Your roof will need to be large enough to fit a suitable number of solar panels, as there's rarely much point putting just two or three panels up there. The average solar panel takes up 2m<sup>2</sup>, and your installer should leave around 40cm on each side of the array, as well as 3cm between every panel.

How long do solar panels last on a flat roof?

Most UK roofs are strong enough to hold solar panels for their entire lifespan - which can last 40 years or more. This is because a solar panel system usually weighs about 20kg per square metre, which the great majority of roofs can hold. However, flat roofs may not always be strong enough for solar panels.

Do solar panels need sunlight?

All your solar panels will need to work is daylight. 3. Not all roof types are suitable. Ideally, your roof should be facing southwards at a 30-45 degree angle - although east- and west-facing solar panels can work well too. You'll need to make sure the roof is free from the shade as well.
