

Is it okay to make the frame of the photovoltaic panel yourself

How to frame a solar panel?

Frame your solar panel for better strength and durability. Measure the size of your glass panel, then use the miter saw to cut the aluminum profile accordingly with a 45° angle. Use 4 brackets to join the angle of the profile. Following this, apply silicone sealant on the edge of the frame; this will help it stick to the solar panel.

Why do solar companies use automatic framing machines?

Frankly speaking that top solar companies are now using automatic framing machines to reduce the labor costs so as to make their solar panel's price more competitive. Solar panel framing refers to the process of attaching protective and strengthening frames to the PV laminates of a solar panel.

What is solar panel framing?

Solar panel framing refers to the process of attaching protective and strengthening frames to the PV laminates of a solar panel. How are solar panels framed? Most manufacturers in China use a simple pneumatic or hydraulic framing machine to attach frames to the PV laminates.
