

Representing the largest independent power producer (IPP) project in Ivory Coast, the FERKE SOLAR venture underscores the nation's commitment to sustainable development, energy independence, and meeting COP26 objectives.

The Ivory Coast is set to begin construction of the \$63.5 million Ferke Solar power plant in Sokoro, which will have an installed capacity of 52 MW. Announced by government spokesperson Amadou Coulibaly in April, the project will commence in the second quarter of 2024 and is expected to be operational by the third quarter of 2025.

The Bondoukou solar power plant, in the Gontougo region, will be installed on an 85-hectare site 420 km north-east of the economic capital Abidjan. The plant will be capable of injecting 87,100 MWh of electricity a year into Ivory Coast's national grid.

The Ivory Coast plans to start building the Ferke Solar power plant in Sokoro, costing \$63.5 million and boasting a 52 MW capacity. Government spokesperson Amadou Coulibaly revealed in April that construction will kick off in the second quarter of 2024, with operations targeted for the third quarter of 2025....

The selected IPPs will build solar photovoltaic power plants capable of delivering 60 MW to the Ivory Coast's national grid. These projects are in line with Ivory Coast's target to generate 42% of its electricity from renewable energy by 2030.

AMEA Power, one of the fastest growing renewable energy companies based in the Middle East, announced today it has signed a concession agreement and 25-year Power Purchase Agreement (PPA) with the Government of Ivory Coast for a ...

Ivory Coast has taken a crucial step in its energy transition with the opening of its first photovoltaic solar power plant in Boundiali. This project, emblematic of the future of renewable energies in the country, aims to reduce dependence on fossil fuels and promote a more sustainable energy mix.
