

# JinkoSolar PV Panel Performance Specifications

Where should Jinko Solar PV modules be installed?

2.2 Site Selection In most applications, Jinko solar PV modules should be installed in a location where they will receive maximum sunlight throughout the year. In the Northern Hemisphere, the module should typically face south, and in the Southern Hemisphere, the modules should t

What should I know before installing Jinko Solar?

as may be present. Do not remove any part installed by Jinko Solar or dis le the module. All instructions should be read and understood before attempting to install, wire, operate and ain the module. Don't lift up PV modules using the attached cables he junction box. Do not touch live termin

What pressure does a Jinko module meet?

er stickers match. Jinko modules are designed to meet a maximum positive (or downward) pressure of 3600Pa (Only refer to the mentioned module type in this manual) and negative (or upward) pressure of 1600Pa. This design load was then tested with a safety

What is the length of a Jinko module?

below in Figure 11. For Jinko standard full module L is 900/1200mm, the half-cut module L is 145/290mm, and the SWAN bifacial module L is 150/250mm. For customized module, L can be base on your condition. Please take the cable length into consideration before designin

What is the size of a Jinko junction box?

ox may be damaged. The cable of the junction box is defined as L, as showed below in Figure 11. For Jinko standard full module L is 900/1200mm, the half-cut module L is 145/290mm, and the SWAN bifacial module L is 150/250mm. For customized module, L can be base

Can a PV module be exposed to sunlight?

ss II.1.2 Warnings PV modules generate DC electrical energy when exposed to sunlight or ther light sources. Active parts of module such as terminals can result in burns, spark, and lethal shock. Artificially concentrated sunlight shall not be directed on e module or panel. Front protective glass is uti

Choose Jinko solar panels if you are interested in a good product with high durability and tested efficiency, and choose especially the Tiger series if you want to get the absolute top when it comes to innovation is the ...

Solar panels 490W - Jinko Solar Tiger 78TR P-type 470-490W Jinko Solar Tiger 78TR P-type 490W solar panels are some of the most efficient and high-performing solar panels on the market. With a power output range of 470W to ...

# JinkoSolar PV Panel Performance Specifications

Solar panels 585W - Jinko Solar Tiger Neo 72HC 565-585W Jinko Solar's Tiger Neo 72HC solar panel is designed to deliver high performance and reliability for residential, commercial, and utility-scale solar projects. With an ultra-high ...
