Who is drygair?

Since its establishment, DryGair has turned an innovative growing concept for treating greenhouse humidity into an internationally recognized agricultural technology company, with presence in major markets in Europe, North America, and the rest of the world.

Does drygair have a heating and cooling system?

DryGair units can be equipped with a heating and cooling system to provide additional temperature control functions. Controlling humidity and temperature together provides complete and efficient control over climate conditions. DryGair is designed for maximum energy efficiency.

Why should you choose drygair?

DryGair controls humidity, saves energy, and prevents diseases, while providing the best ROI in its class. Consult our team of experts to figure out the right solution for your needs. DryGair designs, develops and markets an efficient and environmentally friendly dehumidification solution for commercial horticulture.

What is drygair a new way to grow?

DryGair provides a powerful tool for climate control, giving growers much more than just humidity reduction. DryGair's new greenhouse growing concept 'A New Way to Grow' provides an innovative and holistic approach to cultivation.
