

# Land under photovoltaic panels for rent

Can I lease my land for a solar farm?

Leasing your land for a solar farm can help you create a steady income for 25+years. Contact us today and find out if your land is suitable for a solar farm.

Do landowners get paid for a solar project?

The landowner typically receives annual lease payments or in some cases, may even sell a portion of their land for the solar project. The lease payments become a source of passive income for the landowner and help increase the use of clean energy.

Why should you Lease Your Land for solar?

OYA Renewables offers competitive solar land leases to farmers and other landowners to develop solar projects. Leasing your land for solar supports your family and your community through jobs, income and cleaner air. Developing and building a solar farm takes strong partnerships and expertise to get from start to finish.

What are the tax implications of renting land for a solar farm?

What are the tax implications? Renting land for a solar farm is a commercial lease and is not an agricultural use, so Agricultural Property Relief from inheritance tax may be lost.

Can solar farms be built on flat land?

As with most wind power projects, developers only place solar farms on land that meets certain conditions. The land should be sturdy for solar projects and not fall foul to sinking from soft soil. But it's also essential to consider the landscape for a site, as solar projects are particularly reliant on flat land without steep slopes.

What is a solar farm land lease program?

Solar Farm Land Lease Programs offer an opportunity for farmers, estate owners and other landowners to diversify their income streams and realise the potential of land that may otherwise be left overgrown or redundant.
