

Lefeng repair generator

What types of generators are covered by a generator repair service?

Our high-quality generator repair services cover a wide range of generators, including diesel generators and other power generation units. Depending on the type, make, and application, different generators require different levels of repair and maintenance. Below are some of the factors that can determine the maintenance intervals:

Can a generator be repaired?

We can also repair issues involving fuel tanks, transfer switches and other issues relating to a generator installation. Please don't hesitate to contact us today should you require any type of generator repair or to arrange for a preventative maintenance servicing plan to be put in place for your generator.

Which generators are covered by our team of Engineers?

All major generator manufacturers are covered by our team of engineers. On diesel generators we can replace: radiators, engine heaters, hoses, belts, coolant, oil, battery chargers and the generator controls. With our engine repairs we can support you with water pumps, injectors, fuel pumps and batteries, as examples.

Are generator repair services expensive?

Generator repair services are often competitively priced. Many different companies are offering different levels of generator servicing and maintenance throughout the UK. However, servicing generators is a mindful process and requires exceptional service.

Who needs a generator repair service?

This could be directly with Facilities Managers, Operations Managers or Business Owners. As well as ongoing generator maintenance contracts, we also offer services for one off generator repairs if you're home or personal generator is broken and needs an engineer to come out and repair it. Usually, this is for larger gensets.

How can I extend the life of my Generator?

We can help you extend the life of your generator and avoid the heavy cost of complete replacement with an upgrade programme. Upgrade options include but are not limited to: the diesel engine, fuel system, alternator, control system, ventilation, acoustic and anti-vibration configurations, maintenance access and canopy/container enclosures.
