

# Lightning protection design specifications for energy storage systems

What are the requirements for a lightning protection system?

IEC and EN StandardsThe specification of a lightning protection system should require that the design complies with the IEC 62305 series of design standards and that materials comply with the EN 50164 series of component standards.The International Electrotechnical Commission (IEC) is a body responsible for i

What is a lightning protection standard?

The lightning protection standard is an IEC standard and has therefore been incorporated in the standards of the CENELEC\*member states whilst taking national circumstances into account. Country-specific standard designations and the associated national calculation values can be selected and displayed in the DEHN Risk Tool software.

What is lightning protection level?

Lightning protection level is used to design protection measures according to the relevant set of lightning current parameters. Complete system used to reduce physical damage due to lightning flashes striking a structure. It consists of both external and internal lightning protection systems.

Why is lightning protection system design important?

A proper lightning protection system design is very important to ensure increased protection of a building against lightning and its effects. Dr. K. Janakiraman, Senior Manager - Product Development, OBO Bettermann India Pvt Ltd explains the design guidelines.

How should a lightning protection system (LPS) be connected?

These individual elements of an LPS should be connected together using appropriate lightning protection components(LPC) complying with BS EN 50164 or IEC 62561 series. This will ensure that in the event of a lightning current discharge to the structure, the correct design and choice of components will minimize any potential damage.

How should a lightning protection system be isolated?

Consideration should be given to isolating perimeter contiguous systems by design from the lightning protection system by at least 1 foot (0.3 m) through solid building materials. 164) Ground-Level Potential Equalization - See paragraphs 145 - 152 above.

Architectural and engineering specifications streamline the process of specifying lightning protection systems for virtually any project. For questions about these or any specification, including how best to use or adapt them to your project's ...

Figure 2 - Lightning protection system (LPS) The four classes of LPS I, II, III and IV are determined using a set of construction rules including dimensioning requirements which are based on the relevant lightning ...

A direct lightning strike delivers damaging energy, which even the most robust electrical devices and systems cannot withstand if protection measures are not correctly taken. ...

Research and Design of Lightning Protection System for Oil Tanks C Zhou 1,\*, X Cao 2, Y Li 3 and J Wang 4  
1 School of Information Technology and Electrical Engineering, The University ...

Battery energy storage systems (BESS) also have a vital role to play alongside renewable generation, by capturing the green energy and releasing it to the electricity network at times of high demand. ... A structural ...

PSC utilizes its extensive industry experience to support our clients in accurately assessing the lightning hazard posed to their installations. We develop bespoke lightning protection system designs, utilizing world ...

The International Renewable Energy Agency predicts that with current national policies, targets and energy plans, global renewable energy shares are expected to reach 36% and 3400 GWh of stationary energy ...

A proper lightning protection system design is very important to ensure increased protection of a building against lightning and its effects. Dr. K. Janakiraman, Senior Manager - Product Development, OBO Bettermann ...

For each of these, NFPA 780-2020 outlines unique protection guidelines, covering materials, grounding, bonding, concealed systems, corrosion protection, and various other protective measures. Changes to NFPA 780 ...
