

How much energy does Malawi use?

Malawi relies on biomass energy for cooking and heating, with wood fuel and charcoal accounting for approximately 86% of the country's total energy consumption compared to 10% for oil products, 3% for electricity and 1% for coal.

Does Malawi have hydroelectric power?

Much of the renewable hydroelectric potential of the country is untapped. As per 2018 Population and Housing Census, the national electrification rate in Malawi was 10%, with 37% of the urban population and only 2% of the rural population having access to electricity.

How can Malawi diversify its energy mix?

The government of Malawi has recognized this challenge and has made efforts to diversify the country's electricity mix by promoting the use of renewable energy sources. Currently, JCM solar is feeding 80MW into the grid and Serengeti is feeding in 21MW. EGENCO also supplies 1.3 MW from solar, to Chizumulu and Likoma Islands.

Does Malawi have a low National Energy Policy?

In the context of energy production and distribution in the SADC region, Malawi has a remarkably low National Energy Policy (2018). The Government of Malawi unbundled a vertically integrated energy sector in accordance with this policy.

Malawi: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.
