

What is CRESS & how will it impact Malaysia?

Launched in September 2024, CRESS will enable large corporate consumers to purchase renewable energy directly from independent power producers (IPPs). This will support Malaysia's ambitious target of achieving 31 per cent renewable energy capacity by 2025, 40 per cent by 2035 and 70 per cent by 2050.

Should foreign players participate in BESS projects in Malaysia?

Nevertheless, given that the development of BESS projects in Malaysia is still at an early stage, participation of foreign players with experiences in energy storage system projects may be crucial to support and encourage further projects of the same nature to be developed in the Malaysia energy market in the future.

Should Malaysia charge intermittent renewable producers more?

The SAC, by charging intermittent renewable producers more, discourages renewable energy investment, which could otherwise help reduce reliance on fossil fuels, improve the diversification of Malaysia's energy mix subsequently, and reduce ICPT costs in the long run.

What is Malaysia's CRESS initiative?

Overall, the CRESS initiative represents a pivotal step in Malaysia's pursuit of sustainable energy and market liberalization, showcasing the country's commitment to renewable energy adoption and carbon emission reduction.

Is BESS the beginning of a significant step taken by Malaysia?

This may be the beginning of a significant step taken by Malaysia in achieving such goals given that BESS is labelled as one of the unproven markets in the National Energy Transition Roadmap published by the Ministry of Economy.

Tenaga Nasional Bhd will kick-start a 400 megawatt-hour (MWh) battery energy storage system (BESS) pilot project in this quarter, marking Malaysia's first utility-scale battery storage project to address intermittency issues of renewable energy (RE).

The Ministry of Energy Transition and Water Transformation (PETRA), through the Energy Commission ("EC"), has launched an open bidding program for the acquisition of Battery Energy Storage System ("BESS") capacity through the ...

Discover Malaysia's first sodium-sulfur battery energy storage system (BESS) at a large-scale solar farm. Enhance energy security and support grid stability with advanced NaS battery technology.

On 26 July 2024, the Ministry of Energy Transition and Water Transformation ("PETRA") announced the introduction of the Corporate Renewable Energy Supply Scheme (CRESS), set to commence in
