

Can lithium batteries be used for electric vehicles in Mexico?

As one of the most crucial automobile manufacturing countries, Mexico has recognized the potential of lithium batteries to advance the field of electric vehicles. The present work aims to provide an overview of lithium batteries in Mexico for electric vehicles and highlights the research topics and the current state of the art.

Are lithium-ion batteries safe?

The first theme was fire risk. Respondents commented on the gaps in current UK safety regulations, with one industry association saying, 'Combustion in lithium-ion batteries is a legitimate issue for the industry, and safety standards for lithium-ion BESS needs developing to ensure sufficient fire safety measures are in place.'

Are lithium-ion batteries a good option for stationary energy storage?

For electric vehicles, lithium-ion batteries were presented as the best option, whereas sodium-batteries were frequently discussed as preferable to lithium in non-transport applications. As one respondent stated, 'Sodium-ion batteries are emerging as a favourable option for stationary energy storage.'

Are battery energy storage systems subject to environmental permitting?

DEFRA is planning to bring battery energy storage systems (BESS) into the environmental permitting regime. However, some operators may be unaware that they may be subject to it already, putting themselves in potential legal jeopardy.

What types of batteries are regulated?

The regulations cover all types of batteries, regardless of their shape, volume, weight, material composition or use; and all appliances into which a battery is or may be incorporated. There are some exemptions including batteries used in:

Are lithium batteries hazardous waste?

Depending on the type, capacity and volume of lithium batteries stored you may also need to consider: procedures to be taken in the event of an emergency, including liaison with emergency services. All end-of-life batteries are classed as hazardous waste in the UK and EU, as such they should never be disposed of in general waste.
