What is MFT energy's business model?

MFT Energy's business model is based on generating income from buying and selling power, gas and environmental products, utilizing the volatility as best as possible. Our 2023-2024 growth strategy aims at capturing opportunities in existing markets, expanding into new geographies, and entering a new and related trading segment, environmental products.

How does MFT energy power trade?

MFT Energy Power's trading activities are primarily within short-term Intraday and Day Ahead products. As the transactions within the short end of the market are settled the same or the following day, these products are more predictable and considered as less risky than the longer-term products traded in the Forward markets.

Where is MFT Energy headquartered?

We are headquartered in Aarhus, Denmark, and at the end of 2021, MFT Energy had 87 employees based in Europe, Turkey, the USA, Singapore, and Australia. Our growth strategy is based on growing in our existing markets and expanding into new ones.
