Micro cogeneration system British Indian Ocean Territory

The micro combined heat and power (micro-CHP), or cogeneration, units produce simultaneously decentralized heat and power from a single fuel source at high efficiency. The building integrated micro-cogeneration systems are in the key role in reaching the primary energy and pollutant emissions reduction targets of the EU [2] .

By integrating large numbers of micro-chp, solar cells and wind turbines and possibly also consuming appliances such as heat pumps and electric vehicles via an information and communication system, a so-called Smart Power System or virtual plant can be created.
