Pele Energy Group is a sustainable development company focused on renewable energy and advisory services within the energy sector. The company owns and operates renewable energy infrastructure and provides economic and community development advisory services.

Pele Green Energy has evolved to operate across the full energy value chain. We develop, and operate renewable energy power plants. We are motivated to do all of this because we appreciate the importance of localising these skills for the long-term sustainability of renewable energy production, in South Africa and all the markets we operate in.

Pele Green Energy is an Independent Power Producer that develops, owns, procures, constructs and operates renewable energy power projects, including both Small Scale Embedded Generation and utility scale power plants. We are committed to providing electricity that is generated through renewable energy that will sustain the world.

Pele Energy Group was founded with the intention to drive large-scale structural change. Today it contributes to change by increasing energy supply, by developing, owning and operating renewable energy generation facilities and increasing economic participation.
