

Will increasing imports help ease the electricity supply shortages in Myanmar?

While increasing imports could help to ease the electricity supply shortages in Myanmar, it remains challenging under the current circumstances. Improving power sector financial viability and recovering customer confidence are critical for private sector capital mobilization to enhance the quality of electricity services.

What is happening in Myanmar's power sector?

Myanmar's power sector has been severely affected by the ongoing political turmoil. The power sector has been spiralling downwards since 2021 with prolonged electricity blackouts throughout the country. Electricity generation has been declining, resulting in a widening power supply-demand gap.

Does Myanmar have a power supply gap?

Myanmar's power sector will likely continue to experience significant challenges. To sustain the current level of power supply would require adding 300-500 MW every year until 2030. Scenario analysis on the power supply-demand gap illustrates that available generating capacity is projected to not meet the growing demand.

Are diesel-based mini-grids a solution to Myanmar's power crisis?

Diesel-based mini-grids represented a total of 101 MW of installed capacity in 2020. The 84 percent of the business firms, which were surveyed under the Myanmar Firm Monitoring Survey, reported the use of captive diesel generators as a means of responding to unstable power supply and blackouts.

Does Myanmar have a transmission network expansion plan?

Transmission network expansion has not made much progress since February 2021. A five hundred kilovolt (500 kV) transmission line connecting Yangon and Mandalay was planned before the military takeover. This transmission line was meant to address the bottleneck in electricity transmission between upper and lower Myanmar and enhance grid capacity.

Myanmar's electricity grid is producing only 2,800 megawatts of the required 5,443 megawatts needed each day, according to a statement from the electricity authority released by the junta's information team late Wednesday.

Sembcorp Industries (Sembcorp) announced in its statement issued on 23 August that it has resumed operation of the Sembcorp Myingyan Independent Power Plant in Mandalay Region, Myanmar, following its ...

The Flashfish 330W Portable Power Station is a simple-looking device that's friendly to your wallet. Its unassuming construction features eight ports, including 2 AC, 2 DC, and a 45W USB-C option. Though not the most robust in inputs and outputs, when you spot the modest price tag, the appeal of the Flashfish power station is more apparent.

power outages while industrial zones across the country are bracing for crippling power cuts and surging fuel prices. Increasing the power supply-demand gap is the major challenge to securing reliable electricity services in the country. Myanmar already faced power shortages in 2019, of up to approximately 300 megawatts (MW).

YANGON -- Myanmar's government is trying to address the country's worsening power shortage, aiming to add 1,072 megawatts of new electricity generating capacity ahead of elections in late 2020. The move reflects concerns about growing public dissatisfaction over crippling power blackouts and price increases to help fund a string of power ...
