

What are the main energy sources in Namibia?

Namibia's top energy sources are petroleum, hydropower, imported electricity, and imported coal. The country's own internal resources supply less than one-third of its needed energy requirements. Namibia has high potential for solar, wind and biomass generation.

Where does Namibia's electricity come from?

28% of Namibia's generated electricity come from fossil fuels, while 64% are from hydropower, and about 8% come from renewables. Non-electricity off-grid renewable energy projects include the small/micro wind energy installations used for water pumping, which are very common in Namibia, especially on farms.

Does Namibia have nuclear power?

Most of Namibia's electricity is generated by hydropower. The country is also one of the ten-largest uranium resource-holders in the world and provides 8.2% of global production. The country has stated its interest in introducing nuclear power into its do

How many people in Namibia have no electricity?

There are around 1 million Namibians lack access to electricity, which means that almost half of the country is without access at all (~53% has access & ~47% has no access).

Is biomass a source of electricity in Namibia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Namibia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

What are the different types of energy transformation in Namibia?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Namibia for 2022. Another important form of transformation is the generation of electricity.

Numbat lädt Ihr E-Auto in 15-20 Minuten mit Strom aus Erneuerbaren Energien auf. Ein schneller und unkomplizierter Ladevorgang sorgt für eine hohe Verfügbarkeit der Schnellladestationen. Erfahren Sie mehr zu unseren Standorten und Zahlungsmöglichkeiten oder werfen Sie einen Blick in unsere FAQs.

Numbat provides a quick and easy charging solution for your electric car, powered by renewable energy sources. Our charging process only takes 15-20 minutes, ensuring that our rapid charging points are always available.

Namibia's electricity generation mix is dominated by hydropower, which made up 61.3% as of 2021. Its chief asset is the 347-MW Ruacana hydropower plant, and a second plant, the Baynes Hydropower Project on the Kunene River, is under evaluation. Around 60% of the country's electricity demand is imported from neighbouring South Africa.
