

North Macedonia full solar kit

How will a new solar plant help Macedonia?

Andi Aranitasi, EBRD Head of North Macedonia, said: "The new solar plant will help the country, which faces severe air pollution from coal, to reduce its reliance on ageing coal-fired infrastructure. It will also generate cheap electricity in times of very high market prices.

Who built the first solar plant in North Macedonia?

The 10MW solar plant, built on the site of the spent Oslomej lignite coal mine, was constructed by the public company JSC Elektrani na Severna Makedonija (ESM). This is the company's first solar plant in North Macedonia, developed with a view to diversifying energy sources and supporting decarbonisation.

Is North Macedonia a good place to invest in green energy?

Dimitar Kovacevski, Prime Minister of North Macedonia: "It is really a great pleasure to be here today, where once a big environmental polluter was located and now we are producing green energy. The benefits of this investment are manifold.

By harnessing the power of the sun, the solar farm will significantly reduce carbon emissions, contributing to North Macedonia's renewable energy targets. The project aligns with international sustainability goals, reinforcing commitments to a cleaner and healthier planet.

There is a boom in the production of electricity from renewable sources in North Macedonia because of the country's huge solar resources. Only in January 2023, 26 new photovoltaic power plants with a total capacity of 6 MW acquired licenses from the regulatory commission.
