

North Macedonia power cabinets

Does North Macedonia have solar energy?

However, in the recently submitted final draft of its National Energy and Climate Plan to the Energy Community, North Macedonia has a provision of 400MW solar energy generated from household rooftops PVs.

What is the energy supply in North Macedonia?

ENERGY PROFILE North Macedonia ENERGY PROFILE Total Energy Supply (TES) 2016 2021
Non-renewable (TJ) 93 548 92 443 Renewable (TJ) 19 952 22 166 Total (TJ) 113 500 114 609 Renewable
share (%) 18 19 Growth in TES 2016-21 2020-21 Non-renewable (%) -1.2 -3.0 Renewable (%) +11.1 -0.5
Total (%) +1.0 -2.5 Primary energy trade 2016 2021

Did North Macedonia change its energy regulations?

There were no major energy legislative changes, but North Macedonia continued to harmonize its energy regulations with the EU Energy Community's Third Energy Package (TEP). North Macedonia's state-owned power company was unbundled and partially privatized in the early 2000s.

Can North Macedonia democratize energy governance?

They are a promising sign that a democratization of energy transition of North Macedonia, with wider inclusion of local communities and the public, is achievable. Therefore, such initiatives should be supported as they represent the grass-root level, the bottom-up approach in the democratization of energy governance.

Does North Macedonia have a green energy transition?

When we go back and compare Figures 2, 3 and 4, we see a large gap with the reality at hand, and the options for a green energy transition that North Macedonia has. Today, around 60% of total energy mix and total electricity production of the country comes from either coal, oil or natural gas.

What is North Macedonia's energy mix?

In addition, North Macedonia's energy mix includes a significant percentage of hydropower, having mountainous geography with powerful streams of rivers running through the country. For the time being, the hydropower capacity is partially used.

North Macedonia welcomes investments in the energy sector. The government invites companies to design, build, and operate new large and small hydro power plants, wind, solar, and biogas farms. Companies can also apply for tenders to construct sections of the national gas distribution network.

For a more in-depth look at barriers to a sustainable energy transition in North Macedonia and our proposals for how to overcome them, see our 2021 study with the Friedrich Ebert Stiftung: The Political Economy of Energy Transition in Southeast Europe - Barriers and Obstacles.

North Macedonia: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.
