

Where is Northvolt based?

A Northvolt facility in Vasteras, Sweden, on Sept. 29, 2021. Helena Soderpalm/Reuters Embattled green tech player Northvolt has missed some in-house targets and has curtailed production at its battery cells plant in northern Sweden, according to internal company documents and company sources, underscoring the challenge of ramping up output.

What happened to Northvolt battery?

Battery maker Northvolt will shut down and shift development of lithium-metal battery technology from California to its R&D hub in Vasteras, Sweden, the company said on Tuesday.

Why did Northvolt lay off 1600 employees in Sweden?

On Monday, Northvolt laid off 1,600 of its employees in Sweden. Here is the background to the battery giant's crisis. In the autumn of 2017, Northvolt announced that it had chosen SkellefteÅ for its first large battery factory.

Where is Northvolt labs located?

Northvolt Labs is located 7 minutes outside of VÅsterÅs city. Labs is our R&D center, where we are developing the next generation of battery technology. Here we produce, advance and validate materials and cells for our customers. VÅsterÅs is also home to the Revolt Pilot Plant, where we are working hard to make our recycling process even better.

Where are Northvolt batteries made?

Northvolt, which currently makes its batteries at a factory in northern Sweden, acquired California battery technology company Cuberg in 2021, a 25-staff operation that has since grown to roughly 200 and focused on developing lithium-metal battery technology.

Does Northvolt have a production target?

It did not elaborate on its current production targets, which it said are based on contracted customer deliveries. Hailed as Europe's best chance to weaken China's overwhelming dominance of the electric vehicle (EV) battery market, Northvolt fired a fifth of its global workforce and shrank its operations in September to stay afloat.

Battery maker Northvolt will shut down and shift development of lithium-metal battery technology from California to its R&D hub in Vasteras, Sweden, the company said on Tuesday.

Batteritillverkaren Northvolt ska flytta utvecklingen av det fÅretaget kallar nÅsta generationens litiumbatteriteknik frÅn Kalifornien till VÅsterÅs, uppger bolaget i ett pressmeddelande ...

Northvolt vÃ¤sterÃ¥s SÃ£o TomÃ© and PrÃ-ncipe

August 21, 2024: Northvolt this week announced it was shifting development of its next-generation lithium-metal battery technology from California to its R& D campus, Northvolt Labs, in Västerås, Sweden. The move will drastically affect the some 200 Cuberg employees that work in the San Francisco Bay area.

In 2023, Northvolt was hit by a series of setbacks, incurred a loss of billions and was also shaken by several fatal accidents at the factory in Skellefteå. This year, the problems have escalated with delivery problems, delays, and a heavily strained economy.
