

Why should you lease a solar panel system?

Leasing a solar panel system offers a cost-effective path to adopting renewable energy, ensuring significant savings. With EIC's Lease-to-Own service, you can export excess energy back to the grid and automatically become the full owner of the solar equipment once the lease period ends.

Can a commercial solar PV system be financed with an operating lease?

Financing a commercial solar PV system with an operating lease can deliver long-term energy cost control and clean energy generation on-site.

How do I end a solar panel lease in the UK?

To end a solar panel lease in the UK, you must make some form of payment to the solar company. The lease agreement will outline the conditions and formula for wrapping up the contract, but there are three broad options: Under a buyout, you pay the outstanding balance on the lease agreement.

What is a solar lease?

Solar leases are similar to car leases; they are a form of third-party ownership. Under a solar lease, the third party installs solar panels on your property and then sells you the electricity produced. Your monthly lease payment is based on the estimated annual production of your solar system.

Are leased solar panels a good investment?

Balance sheet impact: leased solar panels will reduce your company's running costs, but they will not appear as an asset on your balance sheet. Your accountant needs to consider the impact of this on your business. What Are The Pros Of Leasing Solar Panels In The UK?

Do you own a solar system with leased solar panels?

In conclusion, you don't own your solar system with leased solar panels, but you do benefit from the electricity it generates. Depending on your energy use, you could shave 20 to 30% off your electricity bill.
