

Opzs solar batteries South Africa

The OPzS batteries from Hoppecke are filled with liquid electrolytes (diluted sulphuric acid). Each vented tubular battery cell has a 2V output. The OPzS batteries are ideal for deep discharge cycles which is the case in off-grid photovoltaic applications.

Eternity Technologies vented lead-acid batteries for the renewable energy market. Optimised design results in a low maintenance, reliable energy storage solution for critical and unstable conditions. 4OPzS-ET 315 SOLAR (2V 316Ah @ 120hr) Features Nominal Voltage 2V Number of cells 1 Design Life 20 years

Eternity Technologies flooded lead-acid batteries for the solar power & renewable energy market. Optimised design results in a low maintenance, reliable energy storage solution for critical and unstable conditions.

Sunlight OPzS batteries are characterized by low maintenance requirements, long service life and excellent capacity performance while operating at high temperatures or unstable power network, thus providing a premium, efficient and cost effective energy solution.

Eternity Technologies vented lead-acid batteries for the renewable energy market. Optimised design results in a low maintenance, reliable energy storage solution for critical and unstable conditions. OPzS Solar Power Compliant with IEC 60896-11 High energy density Robust tubular positive electrode design, compliant with DIN 40736
