

Why do we need solar power in Tonga?

Renewables like solar are a significant means for Tonga to expand energy access, stabilize power grids as well as reduce pollution. Considering the shortage of solar expertise and finances for countries like Tonga, the role of independent power producers and the practice of PPA provide solid support to smooth the way for solar deployment.

Where is Tongatapu solar farm located?

Prime Minister of Tonga today announced the official launch of the 6-MW power purchase agreement (PPA) based Tongatapu Solar Farm located at Fualu, Tongatapu, which has supplied electricity to over 10,336 households since August this year.

Who are Sunergise New Zealand & Tonga Power Limited?

This solar project was completed under the partnership between Sunergise New Zealand Limited and Tonga Power Limited with support from the Asian Development Bank (ADB). Sunergise led the construction and meanwhile united local Tongan civil, mechanical and electrical sub-contractors to the team.

The Tonga Outer Islands Solar Electrification Program has been in operation since 1987, covering the Vava'u and Ha'apai island groups. Almost 90% of the population of these outer islands now has electricity, which equates to approximately 2000 systems, 230 kWp of solar energy and 2600 kWh of stored energy. The aim of the program is

It will provide 100% electricity accessibility to over 280 households on the island. The system is a hybrid of solar and thermal power, which will ensure a reliable and efficient supply of electricity, even during inclement weather. The OIREP project is the longest standing energy project in Tonga.

Prime Minister of Tonga today announced the official launch of the 6-MW power purchase agreement (PPA) based Tongatapu Solar Farm located at Fualu, Tongatapu, which has supplied electricity to over 10,336 households since August this year.

Local environmental groups decided to teach locals how to assemble solar panels, relying on solar cells to cope with post-disaster power shortages. According to Shikulu, the head of the environmental protection organization, solar cells can provide LED lighting for ordinary households without power, charge mobile phones and provide basic ...

"In Tonga, we have taken the decision of building of renewable capacity by 70% by 2030 and solar will be a key driver for achieving our targets. The role of ISA will be crucial in helping the countries strengthen their NDCs and to chart a roadmap for achieving their climate action targets," Hon Tei said.

We currently have a fully functioning Independent Power Producer solar system from Singyes Solar, with a capacity of 2MW. Singyes owns, generates and maintains this solar plant. Once power is generated, Tonga Power only purchases power generated by Singyes at ...

Find solar panel locations in Tonga through our Tonga solar farm map. Analyze the main characteristics of solar farms in this country, sort these by capacity, panels area and landscape area. Discover the largest solar farms in Tonga and find solar farms near you.

We currently have a fully functioning Independent Power Producer solar system from Singyes Solar, with a capacity of 2MW. Singyes owns, generates and maintains this solar plant. Once ...

The Tonga Outer Island Renewable Energy Project (OIREP) will construct Solar Photovoltaic (PV) power plants on 8 outer islands. The "on-grid" portion will be allocated to Ha"apai and "Eua, while the "off-grid" portion will incorporate "Uiha, Nomuka, Ha"ano, ...

This week, people of the island of "O"ua marked a milestone with the successful installation of its solar PV mini-grid to provide residents with 24-hour electricity making it the second island in Tonga to run 100% renewable energy all day, everyday.
