

Do I need a building regulations certificate for my solar panel system?

You should receive a building regulations certificate, known as a completion certificate, for your solar panel system. This certificate will assure you and any future owners that the work met all building regulations, which will make it much easier to sell your property at any point.

Why do I need a solar panel certificate?

This certificate will assure you and any future owners that the work met all building regulations, which will make it much easier to sell your property at any point. Your installer should send you the certificate after they've commissioned your solar panel system. Can neighbours object to solar panels?

Do solar PV installations need to be MCS certified?

Also, the Council of Mortgage Lenders has advised that, as a minimum to avoid the risk of a property being ineligible for a mortgage, both new and existing Solar PV installations must be MCS certified. All renewable energy products are examined by certification bodies against MCS manufacturing and testing standards.

What is an Energy Performance Certificate (EPC)?

What is an EPC? Energy Performance Certificates (EPCs) were designed to be a simple way for people to compare home energy efficiency. They were introduced in 2007 as part of the Home Information Pack (HIP) to help prospective buyers compare the energy use and environmental impact of different properties.

How do Energy Performance Certificates affect your energy bills?

6. How this affects your energy bills Energy Performance Certificates (EPCs) were designed as a simple way to compare the energy use of different properties when buying or renting a home. They give homes a rating between A (very efficient) and G (inefficient) and recommend the most cost-effective ways to improve energy efficiency.

When did solar panels become a building regulation?

In 2005, household electrical work was absorbed into the UK government's official Building Regulations.
