

Photovoltaic panel export numbering rules

Are export tariffs a good idea for solar PV?

For homes with solar photovoltaic (PV) panels, export tariffs like the SEG are a great way to bolster your energy bill savings. In this article, we'll explore how the SEG works, the benefits for solar PV system owners, and how it's shaping greener living in the UK.

How do I export electricity to SEG?

Your property must have a valid Energy Performance Certificate (EPC) rating of D or above. Once these conditions are met, you can apply for a special export tariff with an SEG licensee, who will then pay you for any excess electricity you generate and export back to the grid.

What happens if I export electricity from another SEG licensee?

You will then be responsible for seeking a new SEG tariff for your exported electricity from another SEG licensee. Any electricity exported between the point the contract from the previous SEG licensee stops and a new SEG contract is agreed with a new SEG licensee will not be the responsibility of the new SEG licensee.

How much will I receive if I export electricity?

You'll receive 25p per kWh of electricity you export on a 12-month fixed-term export tariff. Available to : Customers whose electricity is supplied by E.ON Next and have had solar panels installed by E.ON Solar and Storage team from 1 January 2024.

What is the average solar export tariff?

Our analysis of the Ofgem SEG reports from 2020 to 2023 shows that the average solar export tariff has increased since the SEG launched. It started at an average of 3.15p/kWh in 2020, jumping to 4.52p in 2021, and then up to 6.78p in 2022.

Who receives a tariff on Eon next solar & storage?

Customers whose electricity is supplied by E.ON Next. OR: Customers who bought their solar installation from the E.ON Solar and Storage team but do not have their electricity supplied by E.ON Next. You'll receive 25p per kWh of electricity you export on a 12-month fixed-term export tariff.
