

Pope Francis has unveiled a plan to transition Vatican City to solar energy as its primary source of electricity in his latest motu proprio "Fratello Sole" or "Brother Sun." The Holy Father has directed the construction of an agrivoltaic system on Vatican-owned land in Santa Maria di Galeria, located just outside Rome.

Currently it has the territory of the State of the Vatican City under its direct sovereign rule. In the period of 1870-1929 between the annexation of Rome by the Kingdom of Italy and the ratification of the Lateran Treaty establishing the current Vatican City State, the Holy See was devoid of ...

The meeting from 15 to 17 May brings together experts in the field of climate change together with city mayors and regional government leaders who are dealing with its effects. They come from ...

Pope Francis has renewables on his mind as he says he wants Vatican City to run on solar power. To achieve his aim, solar panels will be installed on a Vatican-owned property outside Rome.

The objective of "zero emissions" for Vatican City State by 2050 is not just a dream, but an achievable goal, according to the head of the Directorate for Infrastructures and Services, Father Rafael Garc&#237;a de la Serrana Villalobos.

Power Global is bringing low cost electrification to emerging markets through the development of a universal battery as a service (BaaS) ecosystem, along electrification products for the ecosystem. Power Global is able to electrify vehicles for 1/3rd the cost and provide daily operational savings of up to 35% per day for users.

His role as the head of the Vatican City and the Holy See grants him unique political power as the leader of a sovereign state with diplomatic relations around the world. The Pope's influence extends beyond the Catholic Church, as he is a global advocate for peace, social justice, environmental stewardship, and human rights. Through his moral ...

The meeting from 15 to 17 May brings together experts in the field of climate change together with city mayors and regional government leaders who are dealing with its effects. They come from the Americas, Asia, and Africa. Researchers from universities around the world are also participating.
