Is Trina Solar China a good PV module company?

Image: Trina Solar China's PV module companies released their financial reports for 2022 and the first quarter of 2023 at the end of April, with some of the leading manufacturers posting strong performance. Currently, the competition among AAA-grade PV module companies is fierce.

Why does China dominate the solar industry?

Much of China's dominance of the global solar sector in general, and that of Europe in particular, comes from China's significant investment into solar capacity additions. Ember notes that China accounts for "at least" 80% of the world's solar manufacturing capacity, highlighting the world's reliance on Chinese manufacturing.

Can China sell solar modules overseas?

This is more than the total solar capacity the US installed in the first half of 2023, which stood at 113GW, and demonstrates both China's overwhelming supply of modules, but also its willingness to sell them overseas and expand its influence.
