

Radio and Television Network Lights Up Micro Wishes

Are LED lights causing interference to radio & TV services?

Experience has shown that the lights can be a main factor in the cause of interference to radio and television services. The three most common problems are when LED lights have been used to replace halogen lamps, from fluorescent lighting with broken or poor performing chokes, or faulty street lights. LED lights

What is a 'wires and lights in a box' speech?

In what is now known as the "wires and lights in a box" speech, Mr. Murrow implored the attendees at the Radio and Television News Directors Association convention to make the most of the two electronic media, rather than allowing them to insulate Americans "from the realities of the world in which we live."

Why do I have a problem receiving domestic TV & radio services?

It helps you investigate whether a problem receiving domestic TV and radio services is due to interference from an external source, or is actually a reception problem. Experience has shown that the lights can be a main factor in the cause of interference to radio and television services.

Why do radio signals diffract around hills?

Radio signals diffract around hills because they are a similar wavelength to the hill. Unlock more, it's free! I would just like to say a massive thank you for putting together such a brilliant, easy to use website. I really think using this site helped me secure my top grades in science and maths.

Who paid no attention to Murrow's speech?

The crass, the vulgar, the tacky, the ignorant and uneducated - all those who pander to the lowest level of society and the basest of human behavior who control TV programming paid no attention to Murrow's speech as they developed programming.

What if the unwanted signal isn't there?

When the unwanted one isn't there, reception is normal. Usually the only way to solve the problem is either to get rid of the unwanted signal, or take steps to avoid picking it up. You may need outside help to do this, although certain types of interference can be caused by something in the home, or be due to a problem with the installation.
