It is used by solar installers,housing associations,roofers and developers. The SolarFlash® Slate New Build and and Slate Refit kits are designed for a maximum slate length of 600mm (24?). Why You Need The SolarFlash® Kit?

Can solar panels be installed on a trussed rafter roof?

Additional loading to a roof structure constitutes a material alteration if the loading to the roof is increased by 15% or more. Installation of a single row of solar thermal or PV panels on a modern trussed rafter roof of up to 9m span is generally considered acceptable,without further structural investigation.

Should solar panels be added to a cut roof?

Any proposed loading increase in both historic and more recent cut roofs should therefore be investigated by a structural engineer. The addition of solar panels should not affect the positive wind pressure acting on roofs,as they are aligned to the profile of the roof.

This blind was always rather reluctant to roll up. It fell down while I was cleaning. Now I am struggling to make it roll up after refitting it and I was thinking I might have mislaid one of the fittings. Pic 1 shows the empty ...
