

The ERC provides an overview of the energy sector performance in St. Vincent and the Grenadines. The ERC also includes energy efficiency, technical assistance, workforce, training, and capacity building information, subject to the availability of data. This ERC includes data and information that was provided by government ministries, agencies, or

Rensource is a leading West African provider of renewable energy-related services, it specializes in the development and financing of solar-hybrid captive power provision which provides commercial, industrial, and utility customers, solutions that bridge the gap between desired and available power.

This is the Energy Report Card (ERC) for 2022 for St. Vincent and the Grenadines. The ERC provides an overview of the energy sector performance, highlighting the following areas:

- o Installed Conventional and Renewable Power Generation Capacity
- o Annual Electricity Generation, from Conventional and Renewable Plants

This document presents St. Vincent and the Grenadines" Energy Report Card (ERC) for 2021. The ERC provides an overview of the energy sector performance in St. Vincent and the . Grenadines. The ERC also includes energy efficiency, technical assistance, workforce, training . and capacity building information, subject to the availability of data.

By creating a robust policy framework that responds to the evolving energy needs of the people of St. Vincent and the Grenadines, the country will increase its energy efficiency, reduce its dependence on imported fuels, and ...

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided
