

Rooftop solar power system maintenance

Are rooftop solar panels easy to maintain?

This is a common question among homeowners. Protecting and caring for your investment is essential to owning any item. Thankfully, rooftop solar panels are incredibly durable and have no moving parts, and are therefore very easy to maintain. Even so, let's explore some basic tips to keep your system as productive as possible.

Are rooftop solar panels a good investment?

Protecting and caring for your investment is essential to owning any item. Thankfully, rooftop solar panels are incredibly durable and have no moving parts, and are therefore very easy to maintain. Even so, let's explore some basic tips to keep your system as productive as possible. Related reading: [How To Choose Solar Panels for Your Home](#)

How do I keep my solar panels clean?

In most cases, you can narrow down the culprit for faster-than-usual degradation by monitoring your electricity bill, using system software, or installing a solar monitoring system. For the most part, keeping your panels clear of debris is all you need to do to maintain your system.

What is the difference between ground-mounted solar and rooftop solar?

When it comes to maintenance, the only real difference between ground-mounted solar systems and rooftop solar systems is that ground panels are easier to access and, therefore, easier to keep clean. If you notice a buildup of snow or other debris, you can simply sweep it off with a soft-bristled broom.

Do solar panels need maintenance?

Solar panels generally require very little maintenance in order to function, so yes, you can usually just let them be. The only thing most solar panels need is a periodic light cleaning to make sure dirt, leaves, and other debris aren't obstructing the sun's rays.

Should I perform solar system maintenance on my own?

Do not attempt to perform solar system maintenance on your own! Not only is this a huge safety risk, it may void the warranties from your installer and/or manufacturer. In many cases, cleaning your solar panels should be very hands-off.
