

Rural solar power generation project scam

What is a solar energy scam?

The scams vary, but here's the gist: someone claiming to be with the government or your utility company promises big savings on your utility bills from solar energy or other home improvements designed to increase energy efficiency. If you agree to the scammer's offer, it could cost you tens of thousands of dollars.

Does a rural solar project need local or state approval?

President Biden takes notes during a meeting to discuss clean energy efforts with CEOs of U.S. electric utility companies at the White House in February 2022. Yet every single rural utility-scale wind and solar project needs local or state approval to get built, says Sarah Mills, who researches rural renewable energy at the University of Michigan.

Are free solar panels a scam?

Know that "free" or "no cost" solar panel offers are scams. The federal government does not install solar systems in homes for free. If you're considering whether solar energy is right for you, check out the Department of Energy's guide for homeowners and learn more. Or check out the Department of Treasury's guidance on clean energy.

Is misinformation turning rural landowners unfairly against renewables?

But misinformation spread by groups like Citizens for Responsible Solar is turning rural landowners unfairly against renewables, says Skyler Zunk, an Interior Department official under President Donald Trump and chief executive of Energy Right, a conservative-leaning nonprofit that supports solar projects that preserve ecosystems.

Could a solar plant power a 25,000 home in Page County?

An energy company offered to lease Houser's property in rural Page County to build a solar plant that could power about 25,000 homes. It was a good offer, Houser says. More money than he could make growing hay and selling cattle. "The idea of being able to keep the land as one parcel and not have it split up was very attractive," Houser says.

Should you choose a reputable solar energy company?

When temperatures rise, utility costs do, too. While reputable companies can help you save money with clean or solar energy improvements, scammers offer more than they can deliver.
