Will Russian energy storage firm Renera invest in EV batteries?

June 23, 2023: Russian energy storage firm Renera says a special investment contract providing incentives and financial backing for domestic production of batteries for EVs and stationary storage systems was signed at the St Petersburg International Economic Forum on June 16.

Is Russia about to source more batteries?

With demand for those batteries only increasing as Russia mounts a more serious offensive to break a stalemate in eastern Ukraine, there is a scramble to source more. And not every cell company is about to source tens of thousands of those batteries on their own.

Where is Russia's new lithium-ion battery manufacturing facility located?

Russian state-owned Rosatom State Nuclear Energy (Rosatom) has announced it will build its 3 GWh lithium-ion battery manufacturing facility in Kaliningrad, in Russia's province of the same name, sandwiched between Poland and Lithuania along the Baltic coast.

Will Russia build a lithium battery factory in 2025?

Russian nuclear energy giant Rosatom has acquired a 49% stake in Enertech International, a South Korean lithium-ion battery specialist, and has announced plans to build a gigafactory at an unspecified location in Russia. The start of production is scheduled for 2025.

Where is Russia's battery cell factory located?

Russia's nuclear corporation Rosatom announces the location for its battery cell factory announced in March. It will be built in the western Russian exclave of Kaliningrad and is to produce battery cells for electric vehicles and energy storage systems from 2026.

Could Russia's nuclear power monopoly be a potential partner for EV batteries?

Potanin also named Russia's nuclear power monopoly, Rosatom, as a potential partner for an EV battery venture in Russia. The company also said it is looking for ways to integrate in the global EV battery production as a way to weaken the impact of the Western sanctions against Russia on its business.
