

Will Enel decarbonize Sardinia?

As Enel continues on its journey as a Renewables Super Major, CEO Francesco Starace offers a road map for the decarbonization process in Sardinia (Italy) in which the gas stage could be skipped altogether. And, as part of a just transition that leaves no one behind, the electrification process will create thousands of new jobs.

Could Sardinia occupy a unique position in the Mediterranean?

Such is Sardinia's natural beauty that its "Costa Smeralda" or "Emerald Coast" is famous the world over, but perhaps green is a more appropriate colour for describing the island's future, as it leads the way in the energy transition. According to Enel CEO Francesco Starace, Sardinia could occupy a unique position in the Mediterranean.

Is Sardinia a good destination for sustainable tourism?

In other words, Sardinia is perfect for sustainable tourism. The reason for this optimism is well founded.

Projects for renewables mushroom offshore and onshore Sardinia paving the way for a stormy energy transition. The Italian autonomous region of Sardinia has imposed a moratorium in face of...

From the point of view of solar radiation, the Sardinia region represents one of the regions with the areas with the highest energy efficiency coefficient for solar plants (1,400-1,500 KW/KWp). In 2021, the Group obtained authorization for the first project for an installed capacity of 45 MWp.

Such is Sardinia's natural beauty that its "Costa Smeralda" or "Emerald Coast" is famous the world over, but perhaps green is a more appropriate color for describing the island's future, as it leads the way in the energy transition. According to Enel CEO Francesco Starace, Sardinia could occupy a unique position in the Mediterranean.

Sardinia is far larger than other tourist destinations like the Greek and Balearic Islands (which is a clear advantage in terms of building wind farms and solar power plants), and could...

Residents and environmental groups in Sardinia are raising alarms about the uncontrolled growth of renewable energy projects. They fear that the hasty development of wind and solar farms could irreversibly alter the island's natural beauty and disrupt local ecosystems.

As Enel continues on its journey as Renewables Super Major, CEO Francesco Starace offers a road map for the decarbonization process in Sardinia in which the decarbonization will skip the gas stage altogether. And, as part of a just transition that leaves no one behind, the electrification process will create thousands of new jobs.

Sardinia solar energy Colombia

As Enel continues on its journey as Renewables Super Major, CEO Francesco Starace offers a road map for the decarbonization process in Sardinia in which the decarbonization will skip the gas stage altogether. And, ...

In the sun-soaked landscapes of Sardinia, Italy, a transformative 100kW solar project with high efficiency 550W PV modules is poised to redefine the region's energy landscape. This ambitious endeavor, a collaboration between Eco Green Energy and Star Power, promises not just to generate clean energy but to set new standards in efficiency ...

Sardinia has the potential to become the next green energy model for the Mediterranean Leaving coal and gas behind, thanks to the island's many renewable resources, is a move that can be the driving force for electrification.
