Who is silfab solar?

"Silfab Solar is leading the way in U.S. integration of innovative solar cells and modules by investing in the research and development that allows us to deliver the most advanced, powerful and reliable PV solar for commercial, residential and soon, BIPV customers," said Paolo Maccario, Silfab President and CEO.

What's new at silfab solar in South Carolina?

Silfab's newest factory in South Carolina will soon add 1 gigawatt American-made cell production and another 1.3 gigawatts of module production. BURLINGTON, Wash., May 20, 2024--Silfab Solar advances its program to manufacture next-generation, USA-made solar cells.

Why did silfab solar receive an innovation award?

BURLINGTON, Wash., May 20, 2024 -- (BUSINESS WIRE)-- Silfab Solar has been selected for an innovation award by the U.S. Department of Energy to continue its objective of becoming a national leader in USA-produced, next-generation solar cells, the company announced today.

What makes silfab solar panels unique?

Silfab solar panels are designed and engineered specifically for the North American environment. We incorporate advanced robotics, automation and the latest innovations in solar technology into our manufacturing process to deliver efficient, reliable, high-quality panels with one of the lowest defect rates in the industry.

Will silfab solar become the first solar cell manufacturing facility?

Silfab Solar Inc. hopes it becomes the company's first solar cell manufacturing facility. There are a few offices, thousands of solar panels stacked up in aisles across the warehouse and about a dozen machines sitting idle in the warehouse, wrapped in foil in the hope that the company gets the go-ahead to start construction.

Where are silfab solar panels made?

Silfab Solar Panels are manufactured by a North American-based company called Silfab and are engineered to optimally perform for the North American climate. Silfab is headquartered in Toronto, Canada but has two other manufacturing sites in Bellingham, Washington and Burlington, Washington.

Silfab Solar Inc. has closed on \$100 million of new financing to scale its state-of-the-art solar cell manufacturing plant in Fort Mill, South Carolina. Silfab, a Canadian-headquartered company, announced its intention to produce 1 GW of cells and to add 1.3 GW of module capacity at the facility, which the company said will begin operations by ...
