

# Solar battery project Bahrain

The Electricity and Water Authority (EWA) of Bahrain has released a tender for a new solar power project. This project, set to be built at the University of Bahrain (UOB) campus, will have a capacity of 44 megawatt-peak (MWp). The solar photovoltaic (PV) plant is expected to generate about 75 gigawatt-hours (GWh) of electricity each year.

Seven bidders have submitted proposals to Bahrain's EWA, Ministry of Electricity and Water Affairs for the 72-megawatt, multi-site, grid-tied solar PV project. The project is being procured under the BOOM or Build-Own-Operate-Maintain basis for a duration of 20 years.

Dragon City's solar plant, boasting a capacity of 5.7 MW, stands as the largest solar carport plant in Bahrain and the second-largest solar project in the Kingdom. Over the next 25 years, it is anticipated to generate 9,000,000 kWh of clean renewable energy annually, significantly mitigating the nation's carbon footprint.

The project, valued at approximately BHD 3.8 million (USD 10 Million), will transform Khalifa Bin Salman Port into the region's first fully solar energy-powered seaport. The official signing ceremony marks the onboarding ...
