

What is Tunisian Solar Program?

Tunisian Solar Programme, launched in 2005, is a joint initiative of UNEP, Tunisian National Agency for Energy Conservation, state-utility STEG and Italian Ministry for Environment, Land and Sea. The program aims to promote the development of the solar energy sector through financial and fiscal support.

Does Tunisia have a solar power plant?

First utility-scale photovoltaic plant (10 MW, in Tozeur) was commissioned in 2019 on German money. Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources, mostly from wind and hydro. Solar energy capacity is at 35 megawatts (MW).

What is solar water heating in Tunisia?

Figure 26. Sources: ANME (2019). The solar water heating (SWH) sector in Tunisia was initiated in the 1980s through the creation, in 1982, of the first manufacturing unit for solar water heaters and the establishment of a specific consumer credit system.

What is the productivity of PV solar systems in Tunisia?

With these favourable conditions, the productivity of PV solar systems in Tunisia is very high. According to IRENA's Global Atlas, annual electricity production by PV solar systems varies between 1 450 kWh per kilowatt-peak (kWp) in the northwest region and 1 830 kWh/kWp for systems installed in the extreme southeast region.

Where is the first large scale solar power plant in Tunisia?

The first large scale solar power plant of a 10MW capacity, co-financed by KfW and NIF (Neighbourhood Investment Facility) and implemented by STEG, is in Tozeur. TuNur CSP project is Tunisia's most ambitious renewable energy project yet.

How much money is needed to implement the Tunisian Solar Program?

The total investment required to implement the Tunisian Solar Program plan have been estimated at \$2.5 billion, including \$175 million from the National Fund, \$530 million from the public sector, \$1,660 million from private sector funds, and \$24 million from international cooperation.

GAMCO ENERGY accompanies you to realize your energetic autonomy by taking advantage of the Photovoltaic Solar Energy in Tunisia to produce your own electricity. Solar Energy Today, you can harness the solar energy in many different ways : generate electricity, make hot water, heating buildings and more. ...

Panneaux photovoltaïques Tunisie - ONDULEURS photovoltaïques Tunisie - Installation photovoltaïques Tunisie - Pompage agricole photovoltaïque - Electrification rurale

photovoltaïque

On average, Tunisia's sunshine exceeds 3,000 hours per year with some regions naturally having more hours than others do. Most regions in the south of the country have a solar exposure time of at least 3,200 hours per year, with peaks of 3,400 hours per year in ...

For consumers, the programme provides improved home comfort through the delivery of abundant hot water, on particularly advantageous payment terms; For society in general, the programme reduces the need for large outflows of foreign currency and helps to create jobs in the industrial sector and local service economy.

On average, Tunisia's sunshine exceeds 3,000 hours per year with some regions naturally having more hours than others do. Most regions in the south of the country have a solar exposure time of at least 3,200 hours per year, with ...

Solar Energy in Tunisia. Tunisia has good renewable energy potential, especially solar and wind, which the government is trying to tap to ensure a safe energy future. The country has very good solar radiation potential which ranges from 1800 kWh/m²; per year in the North to 2600kWh/m²; per year in the South.
