Working in partnership with architect, Rob Goodburn, we have completed an ultra-low, integrated renewable system at his new home. The renewables system incorporates roof integrated solar PV and solar thermal, in conjunction with a biomass heating system using a thermal store coupled to underfloor heating and low temperature radiators.

Let's start with the best known, solar energy. In Monaco, it is possible to capture the energy of the sun in two ways: using photovoltaic panels, which transform sunlight into electricity, and with thermal panels, which use the energy produced by the sun's rays to heat water.
