

Solar panel commercial Myanmar

Who commissioned Myanmar's first commercial solar power plant?

State Counselor Aung San Suu Kyi in June 2018 officially commissioned the first, 50-MWdc/40-MWac, phase of Myanmar's inaugural commercial solar power facility, the 220-MWdc/170-MWac, US\$297 million Minbu Solar Power Plant.

What is Myanmar's Solar power potential?

Myanmar's solar power potential is estimated to total around 35 gigawatts-peak (GWp). "So far, less than 1% has been installed so there is huge solar potential," they highlighted. Very good solar potential exists in the central lowlands of Myanmar, where demand is the highest, they added.

Can solar power help a disadvantaged population in Myanmar?

"Moreover, solar can help ensure a just energy transition for citizens affected by energy poverty... Furthermore, 75-85% of Myanmar's population lives within a 25-50-kilometer radius of high voltage power lines, which makes for ideal locations to develop medium- and large-scale solar projects," they noted.

Is solar energy gaining traction in Myanmar?

Solar energy is just beginning to gain some traction in Myanmar, a country that has been gradually opening up its economy and society to the world since 2011.

Is Myanmar a good country for generating electricity?

Renewable energy, in the form of large-scale hydroelectric power, already accounts for around 60%, the single largest share, of Myanmar's electricity generation mix. The country also has an abundance of natural gas, an important export and the source of hard, foreign currency export revenues, as well as domestic power generation.

Burma's (Myanmar's) electricity generation mainly depends on gas and hydropower, while renewable sources such as solar and wind contribute merely one percent to the overall output. However, residential solar systems have gained significant popularity and widespread adoption since the year 2022.
