

# Solar panel to power home United States

How do I choose the best way to use solar electricity?

Before deciding on the best way to use solar electricity at home, assess the potential solar energy that can be produced at your address. Because PV technologies use both direct and scattered sunlight to create electricity, the solar resource across the United States is ample for home solar electric systems.

Should you choose solar energy for your home?

Before starting the process of powering your home with solar energy, homeowners should investigate their energy use and consider potential efficiency upgrades. Homeowners should be well aware of their total electricity usage, and consider low-cost and easy-to-implement efficiency measures before choosing solar.

Are home solar panels worth it in your state?

The top 10 states for home solar are: Are solar panels worth it in your state? 1. Massachusetts Massachusetts won our number one spot - and it wasn't even close. The Bay State hits all the marks a state should aim for when it comes to home solar.

How much do solar panels cost?

A recent study found that solar panels are viewed as upgrades, just like a renovated kitchen or a finished basement, and home buyers across the country have been willing to pay a premium of about \$15,000 for a home with an average-sized solar array. Additionally, there is evidence homes with solar panels sell faster than those without.

Should you install solar panels in your home?

A Forbes Home's survey revealed that nearly half of Americans plan to install solar panels in their homes, but the upfront cost of solar installation is the main deterrent from making the move. Panasonic Solar is our top pick for the best solar panels for homes.

Can you buy a solar energy system with a mortgage?

New homeowners can add solar as part of their mortgage with loans available through the Federal Housing Administration Fannie Mae, which allow borrowers to include financing for home improvements in the home's purchase price. Buying a solar energy system makes you eligible for the Solar Investment Tax Credit, or ITC.
