

# Solar panels made from cardboard

Can you make solar panels from CD?

The good news is that you can make solar panels in your own home by simply reusing household items for only a fraction of a cost. It is an interesting activity for children and can even be introduced at school science fairs. In this article, you will learn how to make a solar panel from CD by a simple process that will take less than an hour.

How do you make a solar panel backing board?

To create a backing board, purchase a thin board made of a non-conductive material such as wood, glass, cardboard, or plastic. Wood is ideal since it's sturdy and easy to drill holes into. Space out your solar cells on the board, leaving a small gap between them.

How do you make a solar cell board?

Measure the total area that all of your cells occupy, adding an extra two inches of space to each side. Cut the board to the dimensions you measured. You should end up with a large board that can hold all of your solar cells, with an extra two inches of board space on every end. Pro tip: The fewer rows of solar cells you create, the better.

How to make a solar panel?

Follow the simple step-by-step procedure and make your own solar panel. The first step is to take an old CD and place it over a flat surface with the shiny reflective side facing the top. Now, take a fine copper coil of roughly 2 feet in length. Fix one end of the coil on the CD hole with the help of super glue.

How do you attach solar panels to a board?

Once your solar cells are prepped, you can start bringing your panel to life -- connecting the cells to your board and to one another. Add a small amount of silicone adhesive to the center back of your solar cells before placing them on your backing board to glue them down.

Can you build your own solar panels?

Yes-- it is possible to build your own solar panels from scratch. It may be challenging to replicate the caliber of a solar manufacturer that has years of research and experience behind it, but it can still be done. Is It Cheaper to Build Your Own Solar Panels?
