

# Solar panels on TikTok

How to promote solar energy on Instagram & TikTok?

Using popular solar related hashtags like #SolarEnergy, #CleanEnergy or #Sustainability can significantly increase your content exposure and boost your brand awareness. Constantly keep an eye on solar-related hashtags that are making waves in the Instagram and TikTok sphere.

What happens if you use a solar hashtag on TikTok?

Content that doesn't relate to solar and renewable energy but uses these hashtags can risk being reported for spam, leading to penalties from Instagram or TikTok. Your products and services revolve around solar technology and renewable energy, thus your hashtags should reflect the same.

Should solar companies use location-based hashtags on Instagram and TikTok?

Using location-based hashtags on your posts can help to increase your local visibility on social media platforms like Instagram and TikTok. This strategy usually appeals to solar companies aiming at reaching potential customers in specific regions or areas.

How many Hashtags can you use on TikTok?

When using hashtags on social media platforms like Instagram and TikTok, you might wonder if there are any limits to them. Instagram, for example, has a limit of 30 hashtags per post. This limit is set in place to prevent spam-like behavior that can be disruptive to the user experience.

Why should you use IG & TikTok hashtags?

While your chosen IG or TikTok hashtag becomes synonymous with your brand, it also aids in increasing your brand visibility. Moreover, your own hashtag makes it much easier for potential customers or interested parties to find your content across social media platforms.
