

# Solar power for telecom towers Central African Republic

With Aktivco owning 3,000 telecom towers, and aiming to have 10,000 by 2025 - according to the Africa Global Funds report - the total, EUR60 million cash injection for solar energy systems will expand the wave of solarisation into more African states.

In a landmark move towards sustainable development, the Central African Republic inaugurated the Danzi solar park, a 25-megawatt solar facility equipped with battery storage, situated just 18 kilometers from the capital, Bangui.

DFC provided financing and political risk insurance to SunFunder's Solar Energy Transformation Fund, which will be supporting a loan to finance the modernization and conversion of diesel-fueled telecommunications towers across the Central African Republic to run on solar power.

With only 35% electrification in Bangui, 8% in major provincial areas, and a mere 2% in rural communities, the Central African Republic views investments in the energy sector as pivotal to fostering growth and broadening ...

Consequently, the customer will convert a network of cell phone towers to solar, ensuring clean and reliable solar energy to support critical telecom services. The project is in ...

reliable solar ...

ESCOTEL will initially supply, install, operate and maintain decentralised solar and storage hybrid power systems for a portfolio of around 900 telecom sites in Sierra Leone, Liberia and over time the Democratic Republic of Congo.

Consequently, the customer will convert a network of cell phone towers to solar, ensuring clean and reliable solar energy to support critical telecom services. The project is in the final stages of contract negotiations, with preparation for financing disbursement and commencement of the EPC phase currently underway.
