

Solar power generation financing lease

Can a power purchase agreement finance commercial solar panels?

A power purchase agreement (PPA) has quickly become one of the most popular ways of financing commercial solar panels. If your energy usage and roof space meet specific criteria, this solution allows you to benefit from a free solar PV installation, financed by a PPA provider.

What is a solar lease agreement?

In a solar lease agreement, a solar company installs and retains ownership of the solar panel system on the homeowner's roof. Instead of purchasing the system, the homeowner makes monthly lease payments to the solar company for the use of the panels and the electricity they produce.

How can solarsense finance your business?

From asset finance and hire purchase to a power purchase agreement (PPA); we will ensure you receive the best advice possible and a finance package to suit your specific business. Solarsense has partnered with some of the UK's leading financial institutions to offer competitive finance for solar panels and clean energy technologies.

Can a business lease a solar panel?

Solarsense has partnered with Fronius to offer a solar panel leasing scheme, allowing your business to benefit from cash flow positive solar panels. Unlike power purchase agreements, you simply lease the solar panel equipment to generate your own clean energy.

How do I finance my commercial solar panels?

Fortunately there are multiple ways you can finance your solar panels other than paying for them in full before installation. Power Purchase Agreements, or PPA is a way of financing your commercial solar panels where you don't have to pay upfront.

Should you finance a commercial solar PV system?

By financing your commercial solar PV you also garner immediate savings from day one, and have no upfront costs. Your cash is protected at the bank. Furthermore, financed solar panels are tax deductible, and having them installed and operational will not affect existing credit lines.
