

The Ministry of Power and State Minister of Solar, Wind and Hydro Power Generation Projects Development has launched a community based power generation project titled "Soorya Bala ...

Step into the world of sustainable innovation where solar power takes center stage! In this exciting blog, we unveil a remarkable array of eco-friendly solar products that go beyond traditional panels. We'll help you ...

Solar power, also known as solar electricity, is the conversion of energy from sunlight into electricity, either directly using photovoltaics (PV) or indirectly using concentrated solar power. Solar panels use the photovoltaic effect to convert ...

Because electricity generation from natural sources like solar or wind energy can be intermittent, there are a variety of solutions for providing clean energy that doesn't rely on the sun or wind. Find out how we're making ...

Solar power plants are systems that use solar energy to generate electricity. They can be classified into two main types: photovoltaic (PV) power plants and concentrated solar power (CSP) plants. Photovoltaic power ...

Solar energy items have the advantages of universality, harmlessness, large reserves, long-term use, etc. According to the calculation of Sunrise technicians, every installation of an M10 ...

Schemes such as PM-KUSUM -- aimed to achieve solar power capacity addition of 30.8 GW by March 2026 -- are transforming India's agricultural sector by setting up decentralised solar power plants, replacing ...

By leveraging data analytics and automation, smart solar panels can adjust their orientation, track sunlight, and address solar energy production issues proactively, ensuring maximum electricity output and solar PV system ...

The efficiency (η_{PV}) of a solar PV system, indicating the ratio of converted solar energy into electrical energy, can be calculated using equation [10]: $\eta_{PV} = P_{max} / P_{inc}$...

Solar power is generated in two main ways: Photovoltaics (PV), also called solar cells, are electronic devices that convert sunlight directly into electricity. The modern solar cell is likely ...

power generation; with solar power taking the lead as one of the main contributors. Generation of clean and reliable power in Sri Lanka with the projected target of "as much as possible" or a ...
