## Solar power roof house

What is a solar roof system?

The system is made up of individual panels mounted onto the roofwhich sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics. With an on-roof system, the panels are clearly added on as an afterthought and are not integrated into your home.

Can solar panels be installed on a roof?

"The solar panels will need to be mounted on the roofby installers who understand roofing and will need some scaffold decks to safely get the panels to the roof.

How do I choose a solar panel for my roof?

Decide on how much of your electricity bills you want to cover with your solar panel usage -- this can be anything from 10-100%. Your decision will affect the system size and costs. Calculate how many solar panels fit your roof. An average solar panel takes about 1.44 m2 of roof space. Don't forget to include at least 30 cm from the roof's edge.

How many solar panels can be installed on a roof?

Your roof will need to be large enough to fit a suitable number of solar panels, as there's rarely much point putting just two or three panelsup there. The average solar panel takes up 2m², and your installer should leave around 40cm on each side of the array, as well as 3cm between every panel.

Can a UK roof support solar panels?

As long as your roof is pitched,has enough unshaded space,and doesn't contain spray foam insulation underneath,it should be suitable for solar panels. The large majority of UK roofs are more than capable of supporting solar panels for as long as you need them to.
