

Solar power supply for home British Virgin Islands

Does the BVI have solar energy resources?

Based on renewable energy resources for proximate island nations, the BVI is estimated to have developable solar and wind resources, although no specific values have been published. In September 2014, BVIEC held a solicitation for companies to develop roughly 2 MW of solar photovoltaic Electricity Sector Overview

What type of power plug do you need on the British Virgin Islands?

On the British Virgin Islands, the power plug sockets are of type A and B. Therefore, you will need a power plug adapter to use devices with plugs that do not fit these types. The standard voltage is 110 V and the frequency is 60 Hz.

Does Cooper Island use solar energy?

Cooper Island generates more than 75% of its electric needs from solar PV and uses solar water heating. Virgin Limited Edition has proposed building a resort on Mosquito Island with enough renewable energy generation to make the site carbon-neutral.

The BVI Electricity Corporation is implementing an initiative to bring solar energy to more Virgin Islands households, Communications and Works Minister Kye Rymer announced during a press conference last Thursday.

Our solar systems are installed to last, even in the harsh Caribbean environment. We go beyond your typical solar install. Our experienced installation team has rebuilt roofs, re-wired faulty systems, and fixed construction errors before starting ...
