

When will Solis images be available?

SOLIS instrumentation is being moved and we do not expect current images again before early September. Images of the latest HMI magnetogram and intensitygram, and movies of the most recent two days of each. As with AIA, full resolution image data are not available for about four days after the time the images are taken.

When will solar panels be installed on the International Space Station?

Launched on June 6, 2023. Installed on June 9 and 15, 2023. The roll-out solar arrays augment the International Space Station's eight main solar arrays. They produce more than 20 kilowatts of electricity and enable a 30% increase in power production over the station's current arrays.

When will a solar array be installed on the International Space Station?

NASA spacewalker Stephen Bowen works to release a stowed roll-out solar array before installing it on the 1A power channel of the International Space Station's starboard truss structure. Launched on Nov. 26, 2022. Installed on Dec. 3 and 22, 2022. The roll-out solar arrays augment the International Space Station's eight main solar arrays.

Who installed a solar array on the International Space Station?

Spacewalkers Thomas Pesquet of ESA (European Space Agency) and Akihiko Hoshide of JAXA (Japan Aerospace Exploration Agency) set up the 4A channel on the International Space Station's P4 (Port) truss segment for the installation of an roll-out solar array. Launched on Nov. 24, 2021. Installed on Nov. 26, 2021.

When will a solar seminar be held in Gandhinagar?

Gandhinagar (Gujarat) [India], January 5 (ANI): As part of the Vibrant Gujarat Global Summit scheduled for next week, a seminar on renewable energy for a sustainable future will be held in Gandhinagar on January 11. [Read More](#) DRC: the International Solar Alliance plans to install 3 15 megawatt solar stations
